## **DETAILED ACTION**

### ***Response to Amendment***

1. The Examiner would like to thank Applicant for the amendments to the title (page 2), claims (pages 5-8), and specification (page 3).

### ***Response to Arguments***

2. Applicant's arguments, see beginning page 11, filed 26 December 2006, with respect to claim 1 have been fully considered and are persuasive. The rejection of claims 1-10 has been withdrawn.
3. Applicant's arguments filed 26 December 2006 have been fully considered but they are not persuasive. Applicant states that claim 11 has been amended to recite similar subject matter to that of claim 1; the Examiner respectfully disagrees and has provided additional information below regarding the current rejection.

### ***Specification***

4. The disclosure is objected to because of the following informalities: headings are required within the disclosure as outlined below:

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.

Art Unit: 2885

- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Applicant argues, on page 9, in paragraph 3, that headings are not required in accordance with MPEP § 608.01(a). However, MPEP § 608.01(a) clearly states:

The following order of arrangement of specification elements is preferable in framing the nonprovisional specification and each of the lettered items should appear in upper case, without underlining or bold type, as section headings. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading.

Also, 37 CFR 1.77(c) states:

The text of the specification sections defined in paragraphs (b)(1) through (b)(12) of this section, if applicable, should be preceded by a section heading in uppercase and without underlining or bold type,

wherein paragraphs (b)(1) through (b)(12) are paragraphs (a) through (l) above.

5. Appropriate correction is required.

#### ***Claim Objections***

6. Claim 11 is objected to because of the following informalities: "and" should be inserted in at the end of line 5 of the claim. Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Suzuki et al. (US 6,083,012).

Regarding claim 11, Suzuki discloses a method for fixing an electric lamp in a reflector housing, comprising the steps of:

clamping a cap of the lamp in a hole in said reflector housing [figure 1], the cap [60] being provided with a first spring means [64] for providing a radially directed outward force for pushing against a surface at an inner wall of said hole [figure 8],

placing a first electrical contact [64] in said spring means against an electrical contact [43] in said surface.

***Allowable Subject Matter***

9. Claims 1-10, 12, and 13 allowed. Prior art fails to disclose or render obvious a lamp cap having two surfaces, one substantially flat and one substantially cylindrical wherein one surface has two electrically insulated parts where each part has electrical connection means for providing power to an electric lamp. Furthermore, prior art fails to show or teach the first part covering a portion of the cylindrical surface being freely movable in a radial direction and another portion of the first part being fixedly attached

Art Unit: 2885

to a portion of the flat surface and the second part covering the remainder of the relevant surface of the cap.
